## WHAT IS AN EDUCATIONAL ASSESSMENT?

Educational Assessments involve the measurement of knowledge and skills to produce a picture of the student's cognitive capacity, abilities, learning style and learning preferences. An Educational Assessment is required to identify and diagnose learning disorders, learning difficulties and intellectual giftedness, and can assist in identifying learning strengths and weaknesses.

### An Educational Assessment will:

- ◉ Identify the presence and type of deficit where one exists
- ◉ Provide recommendations to address the deficit, or educational adjustments to minimise the impact of the deficit
- ◉ Ensure your child's teacher and school are aware of your child's learning gaps or deficits
- ◉ Assist the school in developing an individualised learning plan for your child
- ◉ Support applications for additional funding (in the case of severe deficits or behavioural difficulties).

## NUDGE PSYCHOLOGY

Nudge Psychological Assessment and Consulting offer a broad range of educational, developmental and behavioural assessments. Our Assessing Psychologists have demonstrated track records in psychological assessment, early intervention psychology service delivery and working with families.

### Nudge Psychology now offer comprehensive assessment for:

- ◉ Specific Learning Disorders such as Dyslexia
- ◉ Attention and concentration issues
- ◉ Intellectual and developmental difficulties
- ◉ Memory difficulties such as retention, short and long term
- ◉ Executive functioning difficulties such as emotional dysregulation, disorganisation and problems following instructions
- ◉ Literacy and reading efficiency
- ◉ Emotional functioning

## WHAT IS INVOLVED?

Assessment times and fees can vary considerably, depending on the nature of the assessment, and tests required. In the case of lengthy assessments, testing is scheduled over multiple days to ensure the individual's comfort and to reduce fatigue. Please contact us to discuss your specific needs in more detail.

## REFERRALS

A student can be referred for Educational Assessment by a parent or guardian, teacher or health practitioner. Adult students can self-refer. Medicare rebates are available for the assessment of some, but not all educational difficulties, and a GP Mental Healthcare Plan is required to permit Medicare rebates. Private Health Care rebates are also available, depending on your chosen fund and level of coverage.
